AI Building Blocks for WordPress

- **4 AI building blocks:** PHP SDK, Abilities API, MCP Adapter, and AI Experiments
- **Unified AI SDK:** one interface for any provider or model
- **Abilities + MCP:** make WordPress actions discoverable and AI-driven
- **Experiments Plugin:** test and showcase AI features in WordPress

PHP AI Client

A provider agnostic PHP AI client SDK to communicate with any generative AI models of various capabilities using a uniform API.

This project is an early work in progress.

General Information

This project is a PHP SDK, which will eventually be installable as a Composer package. In WordPress, it could be bundled in plugins. It is however not a plugin itself.

While this project is stewarded by [WordPress AI Team](#) members and contributors, it is

Abilities API

Part of the AI Building Blocks for WordPress initiative

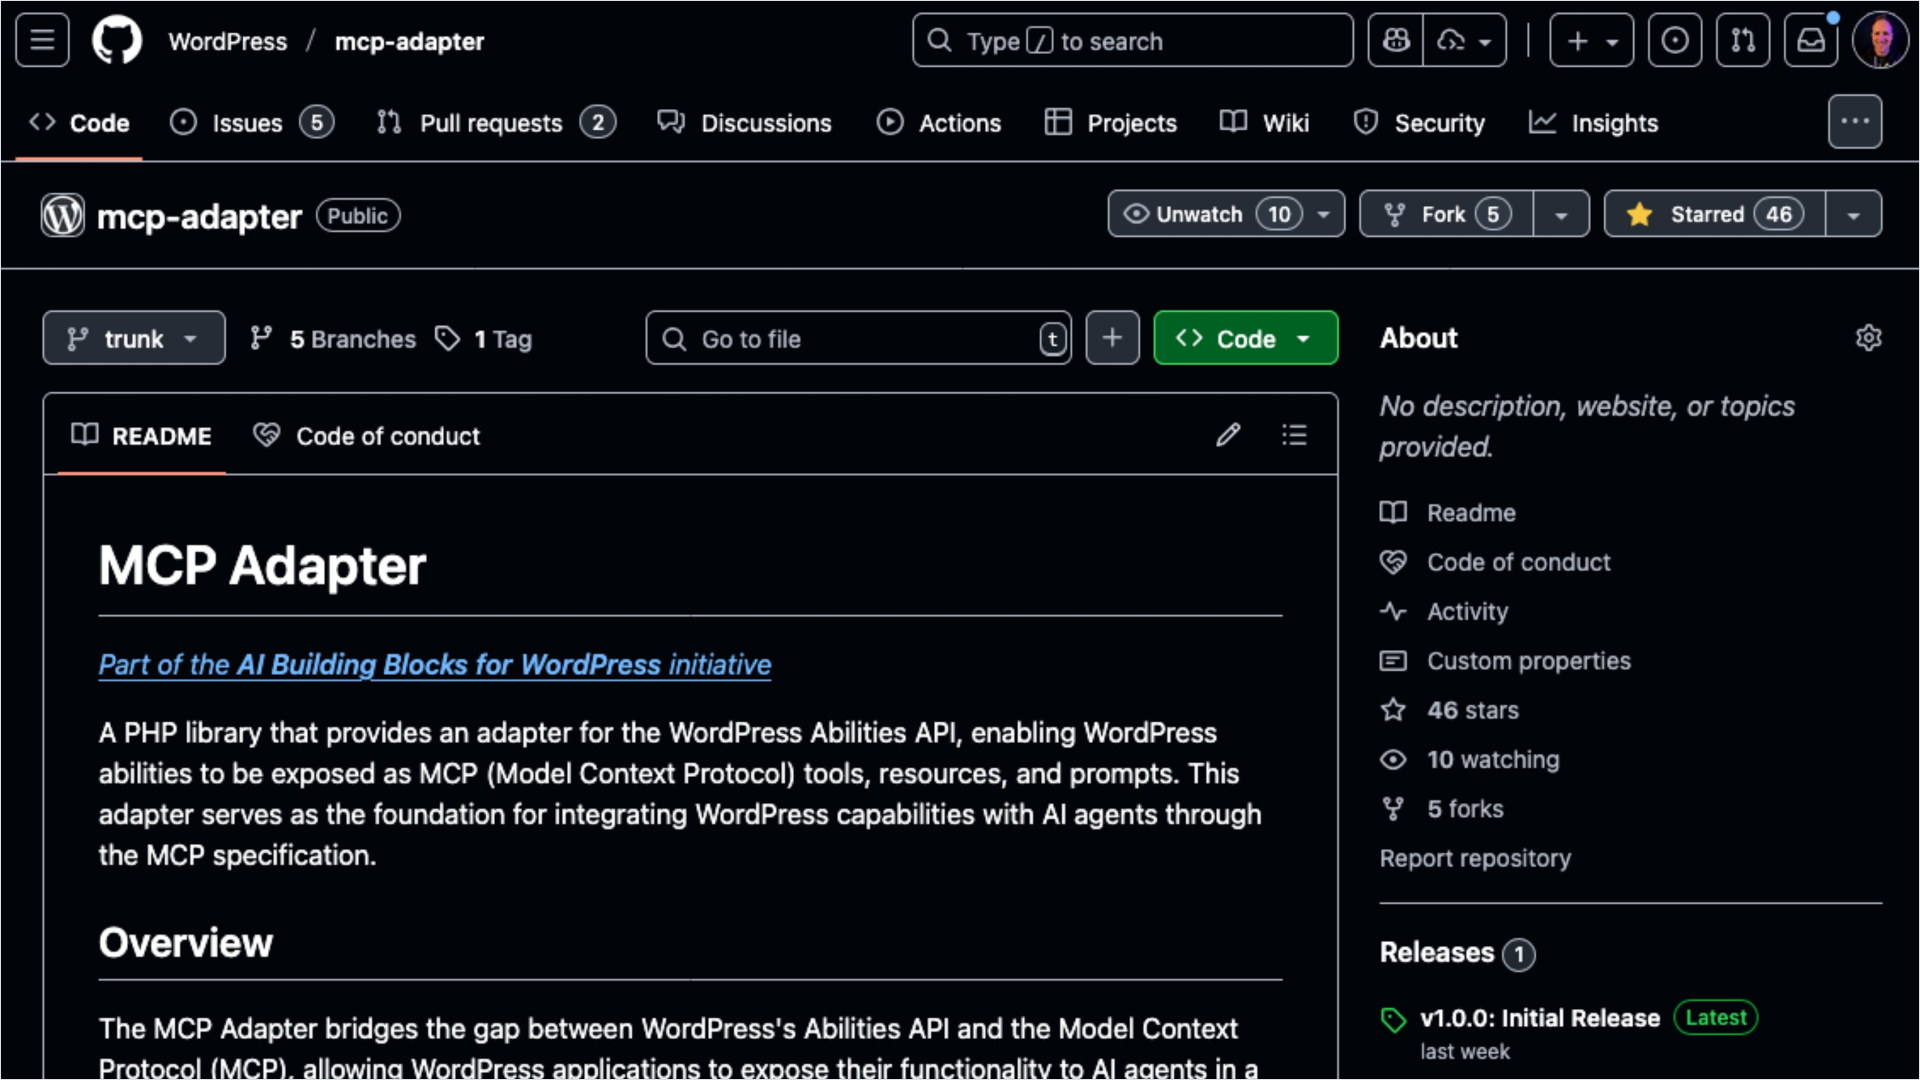

Overview

- **Purpose:** provide a common way for WordPress core, plugins, and themes to describe what they can do ("abilities") in a machine-readable, human-friendly form.
- **Scope:** discovery, permissioning, and execution metadata only. Actual business logic stays inside the registering component.
- **Audience:** plugin & theme authors, agency builders, and future AI / automation tools.

MCP Adapter

Part of the AI Building Blocks for WordPress initiative

A PHP library that provides an adapter for the WordPress Abilities API, enabling WordPress abilities to be exposed as MCP (Model Context Protocol) tools, resources, and prompts. This adapter serves as the foundation for integrating WordPress capabilities with AI agents through the MCP specification.

Overview

The MCP Adapter bridges the gap between WordPress's Abilities API and the Model Context Protocol (MCP), allowing WordPress applications to expose their functionality to AI agents in a

AI Experiments Plugin

Part of the [AI Building Blocks for WordPress initiative](#)

Overview

- **Purpose:** Demonstrate and deliver AI features by combining all AI Building Blocks into a unified WordPress experience.
- **Scope:** Reference implementations, user-facing AI features, and experimental capabilities for testing and feedback.
- **Audience:** WordPress users, content creators, site administrators, and developers learning the AI APIs.
